

Looking for a complete solution to monitor your air or nitrox compressor package? Look no further! Nuvair created the Pro 4 Warn, a compact, water-resistant enclosure containing all monitors and alarms in a simple to use and easy to read format. The Pro 4 Warn combines our oxygen (O₂), carbon monoxide (CO) and carbon dioxide (CO₂) analyzers into one enclosure with our electronic moisture (H₂O) monitor and compressor high-temperature alarm.

SKU 9604

FEATURES

- Audible and visual alarms for O₂, H₂O, CO, CO₂ and high temp
- On / off buttons for individual monitors
- Fast response and accurate
- Temperature compensated sensors
- User replaceable batteries and sensors
- Low battery warning indicators
- Factory reset

ADVANTAGES

- Programmable alarm thresholds
- Audible and visual alarms
- Fast response
- High temp switch
- Compact water resistant container
- Made to test breathing gases
- Easy to operate, reliable and accurate
- Optional relays for external alarm or compressor control

Carbon Dioxide Analyzer

- 0-2000 ppm range CO₂
- Better than 50 ppm accuracy

Moisture Monitor

- Audible visual alarms for high moisture content in filters
- Warning light for filter changes

High Temperature Alarm

- Audible visual alarms for high temperatures at the final stage
- Relays to shut down compressor

Oxygen Analyzer

- 0-100% range O₂ monitor
- 36 month electrochemical sensor
- ±1% accuracy

Carbon Monoxide Analyzer

- 0-50 ppm range CO monitor
- >24 month electrochemical sensor
- ±5% accuracy

WARNING: Never expose gas sensors to pressure or you may cause damage and/or false readings. Damaged sensors will not provide accurate gas analysis. Most gas analyzers can be used to analyze a regulated gas sample flow, the contents of a gas cylinder, or the flow from a regulator. The flow rate of gas must equal 1-5 L/min. To produce this flow, a Flow Restrictor and Regulator may be required. A faulty Flow Restrictor can lead to a false analyzer reading. Flow Restrictors should be regularly tested with a Flow Meter. Inaccurate gas analysis can lead to serious personal injury or death.
